

## About Us

Technology progresses at a breakneck pace these days and keeping up with it all is a daunting task. The factory trained professionals at Dill Communications can help your organization navigate through the maze of hi tech acronyms and varying protocols. Basically, we speak geek especially wireless geek! This coupled with our relationships with the best of the best when it comes to technology companies gives us the unique ability to leverage the latest technology to build a solution around your needs rather than just trying to sell you a box out of our trunk. Our customer base varies from Mom and Pop operations to Fortune 500 companies and also includes a large presence in the Government Market including Public Safety, Education and Utilities. Some solutions you may not realize that Dill Communications can help you with are GPS Asset Tracking and fleet management (NetworkFleet) In vehicle mounts for about anything (Laptops etc) RAM Mounts On site Communications, both Digital and Analog (No Monthly Fees) Wireless Backhaul of data, phone and or video Communications consoles WAN's (Wide Area Networks) ROIP (Radio over IP) Etc. etc. etc. Contact us today for a free consultation on how technology can help your bottom line.
